PORCELAIN PANELS

Inspiring Homeowners for Generations

ENDLESS POSSIBILITIES

We now stock Made in the USA, 126" x 60", 12mm, Porcelain Panels in six colors, polished and natural finishes. Porcelain is a versatile choice for countertops, walls, floors, steps, fireplace surrounds and even doors.

BENEFITS OF PORCELAIN

HEAT RESISTANCE: *One of porcelain's most impressive features is its exceptional heat resistance. You can place hot pots and pans directly from the oven or stovetop onto the surface without fear of scorching or damage. This makes porcelain countertops ideal for busy kitchens especially with the InvisaCook - and - Robert F. Henry is your auothrized InvsaCook dealer.*

STAIN RESISTANCE: *Thanks to its non-porous nature, porcelain naturally repels liquids, preventing spills from seeping in and causing stains. Coffee, wine, and acidic foods wipe away easily, making cleanup a breeze.*

Scratch Resistance: *With a Mohs hardness rating of 7-8, porcelain is highly resistant to scratches, cuts, and abrasions from daily use. While no material is completely scratch-proof, porcelain stands up remarkably well to typical kitchen activities.*

LOW MAINTENANCE: *Unlike granite or marble, porcelain countertops never need to be sealed. Their non-porous surface makes them incredibly easy to clean with just warm water and mild soap, offering a true low-maintenance solution.*

DESIGN VARIETY: *Advancements in manufacturing allow for a vast array of designs, colors, and patterns. From realistic natural stone inspired with intricate veining to modern industrial finishes and solid colors, porcelain offers extensive aesthetic decor versatility.*

Porcelain slabs are engineered to from indoor and outdoor spaces to tabletops, countertops, flooring, walls, custom furnishings, providing home owners, designers, architects, contractors, and builders, a versatile material perfect for any residential or commercial setting.
