ANTIQUE ZELLIGE

Variation, Usage & Technical Information

Variation

Antique Zellige tiles are made entirely by hand in Morocco and each tile will be different from the next. Tiles are treated to create an aged patina, please expect the following characteristics which are intended in this product.

- Chips off the surface of the glaze exposing the clay beneath
- Terracotta exposed on the edges of the tile
- Dips in the surface of the tile
- Uneven edging of the tile
- Wide variation in color/shade between tile pieces
- Glaze pooling in areas of a tile
- Lime pops that expose the substrate of the tile
- Size and thickness variation from piece to piece

Variation between samples and tiles received is possible, as handmade techniques of glazing make shade and color variation an inherent part of the product. Samples received before shipments should be considered indicative of color only. Driftwood Design Lab will not honor any claims made for these characteristics listed above if claimed as defects.

Pools, Spas & Fountains		
<p>Antique Zellige has traditionally been used in pools and fountains in Morocco. However, Zellige tiles do not meet US standards for use in pools, spas or other areas where it will be regularly submerged in water, and we do not recommend Zel for these applications.</p> <p>Use of Antique Zellige in pool, spas and fountains is at the discretion of the customer and no claims for damage will be honored for Zel used in these applications, regardless of installation methods.</p>		

Antique Zellige Installation Guidelines include important methods that if not followed may result in an unsatisfactory installation. For installation instructions, please visit: DriftwoodDesignLab.com
