Technical Features: Visual Evaluation Shade & Texture

Visual Evaluation

V1

V2

V3

V4

TCNA rates tile color and texture variation on a scale up to V4, with V4 indicating the highest variation.

This porcelain tile is rated V2, meaning moderate variation in tone, primarily consistent with slight differences between tiles.

Recommended Grout Joint

Recommended grout joint is 3/16" or greater.

Grout joints of 1/8" inch or less, especially with larger format tiles or running bond patterns, may require floor flatness values in excess of the 1/4" in 10' (or 1/16" in 1.0') standard required by ANSI.

For patterns with running bond/brick joints, Stonepeak recommends a maximum of 33% offset.

Technical Features: Recommended Use

Visible Abrasion Resistance ratings are based on ASTM C1027-19 testing, which measures surface wear under abrasive load, combined with our manufacturer-declared results.
